SUITABLE FOR
ULTRA FILTRATION
PLANTS

Another quality product from the
makers of popular **@dose** pumps

Possible automation

- Semi automatic-manually trigger Backwash
- Based on number of hours the pump is ON
- Signal from Flow sensor
- Any input pulse from Instrument\PLC

Inbuilt configuration

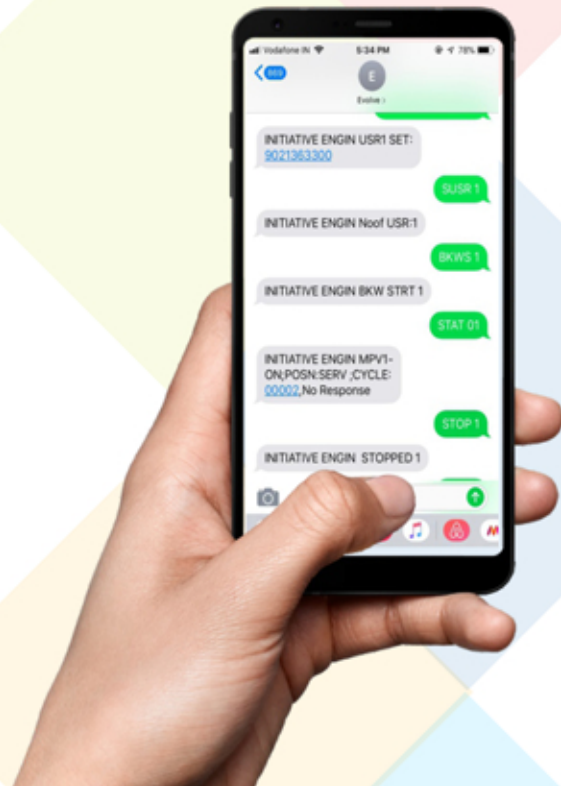

- Stand alone Filter/softener with level controller
- Working stand by operation
- Dual pump operation for Ultra Filtration
- Units in series
- Units in parallel
- Pump on time
- Volume indication using Flow sensor
- RS 485 for remote monitoring
- Brine switch Interlock

Technical Specifications

Inlet/Outlet/Drain Connection	1"BSP
Valve mounting	Side mount front facing [also available in top mount]
Flow rate	5m ³ \hr @0.35kg\cm ²
Max. operating pressure	5kg\cm ²
Ejector suction at 2kg\cm ²	450 ltr\hr

Evolve with GSM module for stand alone Filter/Softener

- Start\Stop operation
- Triggering of Backwash/Regeneration
- Status of valve
- SMS from GSM MODULE on fault condition

Automation can be Customised based on Individual Requirement including Ultra Filtration
