

FC Chemical Dosing Tanks

These closed head dosing tanks offer a simple and neat solution for small dosing applications. FC Chemical Dosing Tanks are manufactured using high quality Virgin Plastic for improved durability and stability.

Available in two Variants – FC Model and Eco Model

FC MODEL

FC Model is available in two capacities: FC - 60 (60 ltr capacity) and FC - 100 (100 ltr capacity)

Features and Advantages of FC model Chemical dosing tanks:

- **Made from UV Stabilised Virgin LLDPE** - Makes it suitable for external/outdoor use
- **Rustproof / Stronger Maintenance Free Tanks** - Provides longer life and durability
- Faster Delivery / Ready to use.
- **Suitable for wide range and various models of Dosing Pumps** - Threaded M 6 inserts & sliding arrangement facilitates easy and direct assembly of a variety of dosing pumps. 50 mm opening is provided for a suction lance or a foot valve and it can be closed with a screw plug
- Suitable for Mounting Stirrer - A flange is provided for an electric mixer with threaded inserts
- **20 mm Plug at bottom** makes it easy to empty tank when required
- **Provided with Volume Gradation in Ltrs.** - This provides an easy and quick way of monitoring chemical level inside the tank
- Max Liquid temperature: 45 °C

Refer Drawing of Tanks for more Technical Details.

ECO MODEL

Eco Model is simple and low cost plain model with a round lid. Available from 30 ltr to 1000 ltr capacity

Model No.	Diameter (mm)	Height (mm)
Eco – 30	250	600
Eco – 60	445	490
Eco – 80	405	720
Eco – 100	470	630
Eco – 125	500	650
Eco – 225	570	900
Eco – 270	720	725
Eco – 300	720	800
Eco – 425	720	1100
Eco – 500	725	1260
Eco – 1000	985	1175
